

STREAMLINE QUALITY RECORD SUMMARIES USING AI TO IMPROVE CONSISTENCY AND EFFICIENCY

Auto-Summarization

QualityWise.ai®

Honeywell

GENERATIVE AI-ENABLED TEXT SUMMARIZATION

For quality professionals in the life sciences industry, summarizing quality events can be a time-consuming and challenging task.

Manual summarization often leads to inconsistencies and delays, making it difficult for teams to make informed decisions quickly. That's where QualityWise.ai Auto-Summarization comes in. It's a simple yet powerful solution that uses generative AI to help automate and standardize the summarization process within TrackWise Digital quality management solution (QMS), reducing the time spent on gathering information and composing summaries while enhancing the quality, consistency, and completeness of the summarized content.

With Auto-Summarization, organizations can streamline their workflows, saving time and improving consistency across all quality event summaries.

IMPROVE SUMMARY COMPLETENESS AND CONSISTENCY

Generate more standardized summaries that includes the

relevant information, enhancing overall quality and compliance.

ENHANCE USER EFFICIENCY AND ACCURACY

Leverage generative AI technology to capture and convey key information more accurately, minimizing the risk of errors or omissions.

OPTIMIZE PRODUCTIVITY

Drastically reduce the time and effort required for summarization tasks, freeing up valuable resources for other critical activities within the quality management process.

SUPPORT USER EMPOWERMENT

Enable users with tools to streamline workflows and enhance productivity, contributing to overall operational excellence.

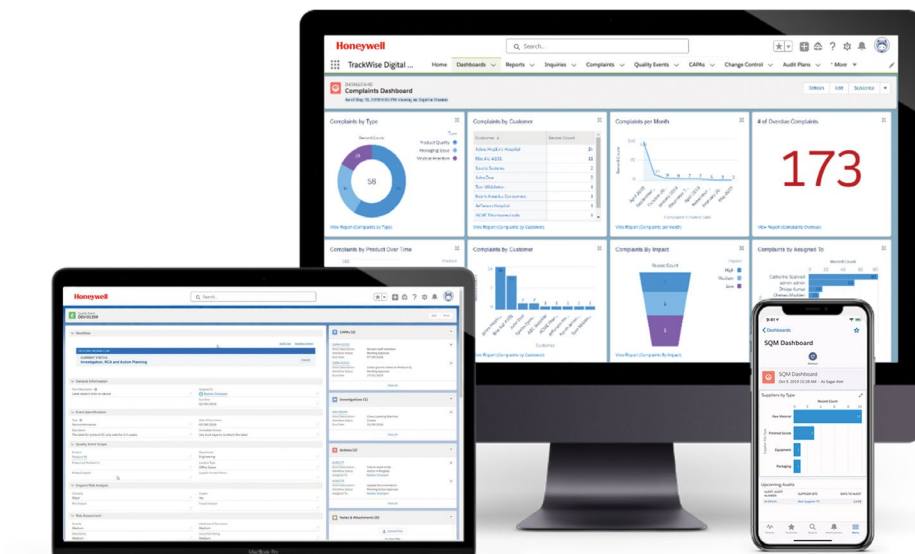

AUTO-SUMMARIZATION

Automated and Standardized Text Summaries

Addressing the time-consuming and error-prone nature of manual summarization processes in quality management, Auto-Summarization is an innovative feature that leverages generative AI technology to automate the summarization of quality events within your organization's TrackWise Digital QMS.

By analyzing the content of quality event records, including complaints, investigations, CAPAs, audits, and more, Auto-Summarization generates comprehensive summaries that capture key information from multiple fields and related records. These summaries are intended to enhance efficiency by reducing the time and effort required for manual summarization tasks, while ensuring consistency and accuracy across all summarization outputs. Users have the flexibility to edit generated summaries as needed, empowering them to tailor the content to specific requirements or preferences.

With Auto-Summarization, organizations can streamline their quality management processes, improve decision-making, and drive continuous improvement initiatives effectively.

FEATURES

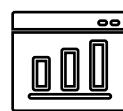

Generative AI Technology

Utilize generative AI algorithms to automatically generate summaries based on the content of quality event records. This helps ensure consistency and accuracy in summarization outputs, minimizing errors and discrepancies commonly associated with manual summarization efforts.

Support for Multiple Use Cases and Processes

Streamline text summaries across various types of quality event records, including complaint closeouts, investigation summaries, CAPA summaries, audit summaries, and more.

Comprehensive Summaries

Summaries encompass information from multiple fields within a record, as well as relevant details from related parent/child records, providing a holistic view of the quality event. Users can then modify generated summaries as needed, allowing for customization and refinement to align with specific requirements or preferences.

Multilingual Support

Facilitate global collaboration and communication by automatically translating and generating summaries in the preferred language for the organization or business unit.

USE CASES

Below are some of the most common applications of the Auto-Summarization capability. It can also be applied to a wide range of processes such as quality events, non-conformances, assessments, and more.

Complaint Management

Automatically generate summaries of customer complaints, consolidating relevant details and facilitating efficient resolution.

Investigation Management

Streamline the summarization of investigation findings, ensuring comprehensive documentation of root causes and corrective actions.

CAPA Management

Simplify the summarization of Corrective and Preventive Action (CAPA) plans and outcomes, aiding in compliance with regulatory requirements.

Audit Management

Facilitate the summarization of audit findings and observations, supporting timely corrective measures and process improvements.

ACHIEVE PROACTIVE QUALITY WITH QUALITYWISE.AI

QualityWise.ai is the premier AI-enabled platform designed to augment quality management decision making. The TrackWise Digital QualityWise.ai solutions are purpose built for quality management and support the use of GxP compliant data for regulated industries.
