

A close-up photograph of a person's hands using a tablet. The person is wearing a dark grey business suit jacket over a light-colored button-down shirt. The background is a blurred office environment with windows and papers. The lighting is bright, creating strong highlights and shadows on the person's hands and the tablet.

REPORT ON QUALITY OR COMPLIANCE ISSUES

TrackWise Digital Intake is an easy-to-use solution that enables any employee to report potential quality or compliance issues.

The simple, browser-based interface allows users to capture critical information and share it with quality and compliance teams from anywhere on any device. This empowers employees to contribute to company-wide quality initiatives and fosters an organizational culture of collaboration and transparency.

EFFECTIVELY CAPTURE QUALITY EVENTS

It can be a challenge to capture and report on all quality or compliance-related issues that occur within an organization. Issues such as a Standard Operating Procedure (SOP) violation or a product manufacturing issue can often go unreported, particularly if

the employee who notices the issue is not empowered to quickly and easily report it to the proper quality/compliance team. With TrackWise Digital Intake, an employee can report a quality event or compliance issue from any browser-enabled device—including tablets and smart phones, providing quality teams with visibility throughout the organization.

LEVERAGE EXISTING TRACKWISE PROCESSES

TrackWise Digital Intake connects with existing TrackWise QMS* workflows – no web services configuration or special programming is required, alleviating the burden of maintaining

custom web forms or building complex integration to TrackWise QMS. TrackWise Digital Intake allows quality organizations to configure the intake form and workflow, based on organizational requirements, and link them directly to TrackWise processes. The user interface provides easy navigation for non-quality personnel, enabling quick reporting of issues while allowing TrackWise QMS to be the system of record for all issues.

Once an issue is reported and accepted through the intake process, the information is quickly sent to TrackWise QMS. Appropriate quality team members are then notified to review the issue, categorize it and determine next steps.

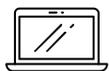

ACHIEVE PROACTIVE QUALITY WITH TRACKWISE DIGITAL

TrackWise Digital is the world's first AI-enabled quality management system. The solution's integrated modules work together to support quality and compliance and enable more efficient and effective decisionmaking to help organizations achieve proactive quality.

FEATURES

Simple User Interface
Accelerate training and user onboarding with a simple and intuitive user interface.

Report from Anywhere
Report from desktop and mobile devices, from outside of the office and outside the network.

Flexible Configuration
Configure solution to reflect current paper-based and internal web-based forms and processes.

TrackWise Integration
Integrate with existing TrackWise QMS⁺ quality processes to ensure accuracy and visibility.

Employee Collaboration
Expand the reach of existing TrackWise quality systems and support product quality initiatives throughout the organization.
